## “The Future of Materials Summit”

Monday 13th & Tuesday 14th November 2017

**VENUE:** The European Convention Center Luxembourg - 4 Place de l'Europe - Luxembourg

**Join us for free** as our VIP guest at inaugural The Future of Materials Summit. **Network** with up to 700 peers from various industries. **Explore** how new materials are opening the way for new industries. **Hear from business leaders** from RUSNANO, HP, Airbus, Goodyear, Tata Steel, Gamma Alloys, Materialise, Gränges, OCSiAl, DuPont and many more.

### Opening remarks by Luxembourg Prime Minister Xavier Bettel

[Discover the program and the speakers](#)

### Why you should attend?

**The Future of Materials Summit** will analyse the modern materials “ecosystem”, from research and development, via supply chains, to business applications. Its purpose will be to address such questions as:

- How can advances in material science unlock new opportunities for innovation?
- How can this ecosystem be made more efficient and environmentally friendly?
- How can materials’ performances be improved throughout their life cycles – from the moment they are made to the moment they are recycled after their job is done?
- How can governments encourage manufacturers to develop new materials and to refine their production methods – if, indeed, such encouragement is thought necessary?
- And how are new ways of designing and manufacturing things reshaping industry?
